eskimo hp

NEW

HP
HIGH
PERFORMANCE

Sava introduces a new specialist winter tire: the new Sava eskimo hp. Designed for all winter road conditions, the Sava eskimo hp offers high performance on snow and ice. Optimised directional winter tread design, combined with a full silica compound, provides outstanding handling, even in the most difficult of winter circumstances.

The snowflake symbol indicates that our new winter tire meets the strict performance standards of the tire industry.

1. Great snow traction & handling

- Sharp directional winter tread design
- Optimised tread design stiffness distribution with FEA tools
- Multi radius cavity shape
- Interlocking blades
- 28 m blade length

2. Great wet braking

- Full silica tread compound

3. High performance handling

- High performance tire construction
- Monoply carcass

4. Good Mileage

- Full silica tread compound
- Multi radius cavity shape
- Optimised tread design stiffness
